

The Technology Transfer series will cover the area of technology transfer extensively through subjects such as cooperation of agreements, licensing, interaction with industry, patent strategy, financing operations, policy issues, spin outs, cultural aspects of negotiations and much more.

The booklets are meant as eye openers to administrative staff in technology transfer offices and other actors within this area. However, as the text selection is comprehensive, the booklets are also valuable in other contexts where it is necessary to discuss the transfer of technology.

Articles in this booklet:

Sachi Hatakenaka: *Culture of Innovation: Lessons from International Experience*

Gillian E McFadzean: *Embedding Innovation in Support of Knowledge Transfer*
