

The Technology Transfer series will cover the area of technology transfer extensively through subjects such as cooperation agreements, licensing, interaction with industry, patent strategy, financing operations, policy issues, spin outs, cultural aspects of negotiation and much more.

The booklets are meant as eye openers to administrative staff in technology transfer offices and other actors within this area. However, as the text selection is comprehensive, the booklets are also valuable in other contexts where it is necessary to discuss the transfer of technology.

**Articles in this booklet:**

**Kevin Cullen:** *Knowledge Transfer: The Role of the University in Economic Development*

**Tom Hockaday:** *Universities Contribute to Economic Development but That is Not Why They Exist*
